

VibeStand

PROFESSIONAL GUITAR & BASS AMP STANDS

The Vibestand® amp stands are specifically designed for valorizing every musician's experience. Driven by desire of sharing **Solidsteel's 30-year experience** in the High-End Audio Market to the world of Guitar and Bass amplification, having for decades created solutions dedicated to the audiophile systems, we decided to enter in the MI universe with the first **Professional Amp Stand** in worldwide market.

When playing, thanks to its stainless steel regulable spikes, the stand damps the amount of vibrations generated by guitar and bass amps. The result is a **richer sound**, full of harmonics, **crystal clear** but always balanced, with necessary structure to give the best **at any volume**, even at the highest, without having unwanted interferences. The yield is guaranteed. It only takes **a few minutes to mount** the stand correctly: just screwing the feet with the **S Series Spikes** to the shelf and placing everything on the included **Pads** (protective floor discs).

The range is available in different sizes, each dedicated to all typologies of amplifiers, from the smallest **1x12 combos** to the hugest **4x12 cabinets**.

The selection consists of three versions: **S** and **L** (available for both guitar and bass in different sizes) and an **XL**, for **a total of 5 stands**.

We recommend to carefully check **your components dimensions** before of choosing your ideal Vibestand®.

Designed for playing in a **music room**, on a **live stage** or in a **professional recording studio**. You and your amplifier will be ready for your music sessions!

Visit our website and find the best stand for your gear. Feel free to contact us for any technical suggestion.

Vibestand® your Music!
